

# Release Notes PostgreSQL Provider 5.0.2 (Englisch)

## Summary

This new version fixes a single issue related to the IMBatch. Customers not using the IMBatch, may choose to keep using version 5.0.1 as they do not benefit from this version in any way.

The problem fixed in this version caused a crash of the IMBatch in case Autodesk AutoCAD Map 3D has not been prepared for the execution of one-click-maintenance tasks. The fixed version works just as it used to, no matter if AutoCAD has been prepared or not.
